Re: Observations of Bird Control Effectiveness at Ponca City Aquatic & Family Center-YMCA

Dear Vence:

First, I wish to express our appreciation for the help of Meneely Wildlife Control in protecting our grass seeding operations from pigeons and dove at the Ponca City Aquatic & Family Center-YMCA. The area you protected from the pigeons and doves was over 30 Acres and you did an excellent job and started in only a matter of a few hours notice.

Vence, you also did an excellent job of explaining the methods you employed for pigeon and dove control so I could pass that information along in this very sensitive matter. The control you developed was very effective and you adjusted as much as possible to minimize the disturbance to the neighborhoods. I also appreciate the way in which you monitored the success and tried adjustments to reduce the noise complaints in the neighborhoods. Also I appreciate your timely input on trials to discontinue the bird abatement as rapidly as possible.

In addition to pigeon and dove control, you also taught me a great deal more about abating of nuisance wildlife problems. I included all your contact information above so I would have ready access to that information the next time we are in need of your services.

If you have any questions or comments, please do not hesitate to contact me at 763-8046 or by e-mail at chapmmn@poncacityok.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Mike Chapman".

Mike Chapman, P.E., CFM, Assistant City Engineer
